

# Professional WHITENINGtrays

for Whitening Treatments

# Quick White™.net

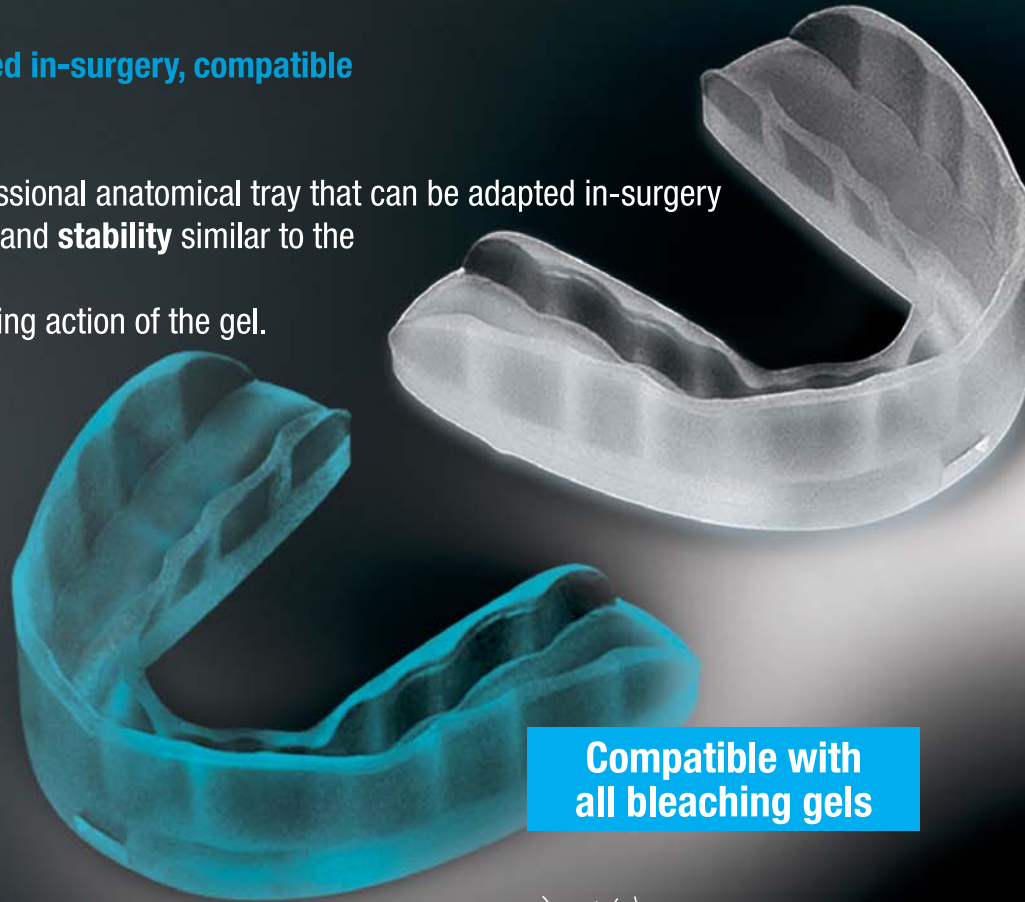

The first professional tray that can be adapted in-surgery, compatible with all whitening gels.

ProfessionalWhiteningTrays® is the first professional anatomical tray that can be adapted in-surgery in a few seconds and is able to ensure **comfort** and **stability** similar to the individual ones made in the laboratory. Perfect adherence to teeth increases the whitening action of the gel.

**Features:** ergonomic customisation device, hole in the centre to aid breathing, two colours to differentiate between lower and upper arches.

The best comfort, stability and effectiveness

- Anatomically Preformed
- Just Boil, Suck and Bite
- Upper and Lower Arches
- Breathing Comfort
