

# Veterinary Surgical Laser Procedures

## Small Animal

- Biopsy
- Bulla Osteotomy
- Ear Canal Ablation
- Epulis Removal
- Gingival Hyperplasia
- Gingivectomy/Plasty
- Laryngeal Granuloma
- Laryngeal Scar Removal
- Laryngeal Web Revision
- Lymphocytic Plasmacytic Stomatitis
- Oral, Ear, Nose & Throat
- Oral Mass Excision
- Osteosarcoma of Palate
- Partial Mandibulectomies
- Partial Maxillectomies
- Proliferative Otitis, Sterilization and Ablation
- Ranulas
- Salivary Gland Removal
- Salivary Mucocoeles
- Soft Palate Resection
- Squamous Cell Carcinoma Removal
- Tonsillectomy

## Ophthalmology

- Conjunctiva Treatment
- Distichia, Ectopic Cilia
- Entropion
- Eyelid Tumor Removal
- Hemangioma Removal
- Mast Cell Tumors
- Squamous Cell Carcinoma Removal

## Surgery and General Surgery

- Acral Lick Granuloma Ablation
- Anal Sac Abscessation
- Castration
- Ceruminous Adenocarcinoma
- Chronic Ulcer Debridement and Sterilization
- Cranial Cruciate Ligament Rupture - Debridement
- Cutaneous Masses - Tags, Inclusion Cysts, Papillomas
- Declaw
- Deep Mass Removal
- Epibulbar Melanoma
- Fibrosarcoma
- Graft Bed Preparation - Infected Wounds
- Granulation Tissue Shaving
- Hemangiopericyoma
- Hemostasis
- Hepatic Carcinoma - Partial Hepatic Lobectomy
- Liposarcoma Resections
- Malignant Melanoma
- Mast Cell Tumors
- Perianal Fistulas
- Perianal Tumors

- Perianal Urethostomy Stricture Revisions
- Pericardectomy
- Rhabdomyoma of Flank
- Squamous Cell Carcinoma
- Subtotal Prostatectomy
- Tendon Sheath Tumors
- Thyroidectomy
- Transitional Cell Carcinoma of Bladder
- Traumatic Wound Debridement
- Tumor Bed Ablations
- Tumor/Mass Removal
- Urethral Prolapse Resections
- Urinary Bladder Polyps
- Vaginal Tumors - Leiomyoma, SCC and Fibrosarcoma

## **Equine**

- Ablation of Penile and Cervical Lesions
- Entrapped Epiglottis Procedure
- Ethmoid Hematoma
- Gutteral Pouch Membrane Ablation

## **Avian and Exotic**

- Adrenal Gland Removal (Ferret)
- Anal Sack Removal (Skunk, Opossum, Squirrel)
- Avian Pox Lesion Removal
- Bumblefoot
- Canthoplasty for Lid Deformities
- Castration (Iguana, Rat, Rabbit, Monkey, Skunk, Squirrel, Opossum)
- Cesarean Section
- Constricted Toe Syndrome
- Diptheroid Membrane Obstructing Choanal Opening (Vitamin A Deficient)
- Eyelid Polyp Removal
- Fibrosarcoma (Avian) Removal
- Granulation Tissue Ablation
- Histiocytoma of Forepaw
- Hysterectomy (Avian, Chinchilla, Rat, Rabbit, Guinea Pig, Monkey)
- Lipoma Removal
- Liver Mass Removal (Ferret)
- Lymph Node Biopsy (Ferret)
- Nasal Polyp Removal (Avian)
- Nephroblastoma
- Papilloma Removal
- Renal Adenocarcinoma
- Skin Incisions
- Stripping of Tendons
- Synovial Cell Sarcoma Removal (Avian)
- Uterine Adenocarcinoma
- Vocal Fold Excision
- Xanthoma Removal
- and many more...

Over the last twenty years Veterinary medicine/treatment has improved by leaps and bounds. Newer drugs, techniques and equipment have opened up exciting avenues for veterinarians, allowing them to confidently undertake procedures that previously may have seemed daunting. Now our advanced laser scalpels are available for surgical use on your animal patients.

Compared with the traditional use of a scalpel blade, lasers create less bleeding, reduced pain and far less swelling at the surgery site. Visibility is significantly enhanced for the surgeon and due to the excellent control of hemostasis (bleeding), the surgery is often performed in shorter time. Patient recovery is also enhanced.
